CAPABILITIES STATEMENT

Founded in 1978, LaBella Associates, D.P.C (LaBella) is a full-service environmental consulting and remediation firm. We specialize in comprehensive engineering, consulting, and remediation services that can address any aspect of the built or natural environment, including buildings, civil, power systems, and transportation engineering; environmental consulting, research, and remediation; architecture and interior design; landscape architecture; planning; program and project management; survey and mapping; and solid waste and recycling services.

Our environmental consulting support encompasses air permitting, brownfield and urban redevelopment, environmental due diligence and remediation, environmental permitting and compliance, regulated building materials, water supply and resource planning, emerging contaminants, and wetlands and ecological services. LaBella's environmental remediation services, which include environmental and geotechnical drilling, ecological restoration, tank removals, soil excavation, treatment systems, and in-situ remediation, complement our environmental consulting expertise.
